July 17, 2012

bigml®

Join us to get to know first-hand BigML's cloud-based machine learning service and use the opportunity to easily bring machine learning to your own project in a boot camp with two of the creators of BigML.

12:00 BigML - Machine Learning Made Easy

In the "Big Data" era, rapidly and easily getting insights from your data or creating data-driven applications does not have to be painful. BigML is working to make machine learning extremely easy to use and seamless to integrate. We will show you how BigML can help business managers, application developers, and data scientists in data-rich domains build their own predictive models in a matter of minutes.
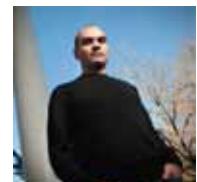

13:30 Free Lunch (Yes, there's such a thing!)

15:00 Hacking with BigML.io - The BigML API

A short introduction to the BigML API, its design principles, and how its sources, datasets, and models work. Plus a quick overview of the bindings for Python, R, Ruby, Java, Clojure, Objective-C, and, finally, a hands-on session to get your own data-driven or smart application up and running.

18:00 Free Coffee (Yes, there's such a thing!)

Francisco J. Martin, CEO at BigML

Francisco holds a 5-year degree in Computer Science from Technical University of Valencia and a Ph.D. in Computer Science from Technical University of Catalonia. He worked on his thesis at the IIIA-CSIC. He has cofounded and led three AI-related startups: Intelligent Software Components SA in 1999, Strands Inc in 2004, and BigML Inc in 2011.

jao, CTO & hacker-at-large at BigML

jao holds a Ph.D. in Physics from Barcelona University and BS in Computer Science from National University of Distance Education. He has worked for startups like Intelligent Software Components SA, Scytl SA or Oblong Inc and companies like Google Inc. He cofounded BigML Inc in 2011.

Please contact **events@bigml.com** if you plan to attend the boot camp session.
